

AQUATT in FP7

Science. Communication. Knowledge. Innovation.

AquaTT in FP7

At AquaTT, we work alongside Europe's top researchers to help tackle major societal challenges by ensuring that new knowledge generated from EU research is effectively transferred resulting in uptake and measurable impact.

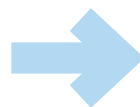

We are partners in 19 EC-funded projects across FP7, Interreg and Lifelong Learning programmes. We work with over 250 institutes in over 40 countries and have a nonprofit mandate and SME status in FP7.

What we have to offer:

With 20 years' experience, AquaTT specialises in capturing, channelling and distributing knowledge to ensure that its full potential is realised. We have evolved from our original role as a University Enterprise Partnership (UETP) founded under the EU COMMETT Programme, to become a leader in the field of scientific knowledge transfer and dissemination.

Our Team

Our multidisciplinary team has recently grown in strength and includes members from a range of different professional backgrounds, including scientific research, teaching, business, communications and project management. We have built on our success in the marine science domain and now offer our services to the energy, environment, health and food domains also.

Ensure knowledge is effectively managed

As a partner in research consortia, AquaTT can:

- Demonstrate value creation by effectively communicating research findings
- Transfer knowledge outputs to end-users
- Design best-practice knowledge transfer methodologies
- Disseminate knowledge using our extensive industry, policy and university networks
- Facilitate synergy across different projects

AquaTT's Project Participation and Roles

The table below summarises the projects in which AquaTT is currently participating and our roles within the Consortia.

EU Funding Programme	Project Logo	Name of the project	AquaTT's role in the Project				
			Project Management	Dissemination	Knowledge Transfer	Education & Training	Stakeholder Engagement
		European Marine Research Knowledge Transfer and Uptake of Results	✓	✓	✓		
		Interaction in European Coastal Waters: A Roadmap to Sustainable Integration of Aquaculture and Fisheries	✓	✓	✓		✓
		The Future of Research on Aquaculture in the Mediterranean Region		✓			✓
		Supporting Governance and Multi-stakeholder Participation in Aquaculture Research and Innovation		✓	✓	✓	✓
		Marine Genomics for Users		✓	✓	✓	
		Aquaculture Infrastructures for Excellence in European Fish Research		✓	✓	✓	✓
		Health, Environmental Change and Adaptive Capacity: Mapping, Examining and Anticipating Future Risks of Water-related vector-borne Diseases in Eastern Africa	✓	✓	✓		✓
		Advanced Research Initiatives for Nutrition & Aquaculture		✓	✓		
		Socio Economic Effects of Management Measures of the Future CFP		✓	✓		✓
		Maximising Yield of Fisheries while Balancing Ecosystem, Economic and Social Concerns		✓	✓		✓
		Sea for Society		✓	✓		✓
		Fisheries and Aquaculture-Oriented Research Capacity in Egypt		✓		✓	✓
		Innovation Transfer Network for Mediterranean Mariculture		✓	✓	✓	
		Thematic Network for Aquaculture, Fisheries and Aquatic Resource Management	✓	✓		✓	✓
		Inclusion of Secondary Service Professions within Fishery to the Normal VET System		✓	✓	✓	
		Sustainable and Environmentally Friendly Aquaculture for the Atlantic Region of Europe		✓	✓		✓
		Priority Environmental Contaminants in Seafood: Safety, Assessment, Impact and Public Perception		✓	✓		
		Marine Microorganisms: Cultivation Methods for Improving their Biotechnological Applications	✓	✓	✓		✓
		Science and Technology Advancing Governance on Good Environmental Status		✓	✓
